Exam 480: Programming in HTML5 with Javascript and CSS3

CompuEducación
Monterrey, Nuevo León, México
2017

Informatic Bachelor Degree

Universidad Veracruzana
Xalapa, Veracruz, México
2009

WORK EXPERIENCE

C.E.C.M. OF S.E.V.

Chief of System Design Office

June 2009 – September 2011

Xalapa, Veracruz, México

Desktop and Web applications development with Microsoft Visual Studio .NET. Migration of Fox Pro applications to Microsoft Visual Studio .NET web applications with Microsoft SQL as database. Consuming Web Services since Front-end with AJAX of jQuery. Processes Optimization through automation and digitalization.

CONSULFED

Project Manager

September 2011 – March 2014

Xalapa, Veracruz, México

I worked in SIIIES application update. SIIIES is a web application, developed in Microsoft Visual Studio .NET with a Microsoft SQL database. The update it was in UI and processes optimization. This web application it was used by Secretaria de Educación of different states, like a Veracruz, Puebla and Nuevo León, to name a few. In Secretaria de Educación de Puebla we developed another web application to Budget Planning office to management the request of budget of each budget item.

XPORTAL GROUP

Development Analyst

March 2014 – October 2015

Monterrey, Nuevo León, México

I worked in xPortal application update. xPortal is a web application, developed in Microsoft Visual Studio .NET with a Microsoft SQL database. The update it was in UI and processes optimization. The before version used a Telerick plugin to use controls in server side, I changed the controls to use the Ext.NET nuget. In the Front-end it was necessary use Ext Framework in javascript.

I participated in a Smart City demo, where with a Panic button, the policemen, firefighters and hospitals can know where there is a emergency with a geoposition.

I developed a xPlay application, that it use to create backups of CISCO Media Sense audios. This application use the API of CISCO Media Sense to search the audios, create a backup of audio file in a own server and a new record in a Microsoft SQL database. The xPlay lets make a search in records already saved with specific filters, like a duration, tags, to name a few.

LAST WORK

DEFINITY FIRST

Software Consultant

October 2015 – October 2018

Monterrey, Nuevo León, México

I have worked in different projects, to different clients, with different technologies like a MVC .NET, Microsoft SQL, Angular 1 and 2, Wordpress, MODX, MySQL, NodeJS and MongoDB.

I have been in different phases of application development, like a Requirements definition UI Design, Development, Implementation and Maintenance.

PORTFOLIO

ARMETICA · <http://armetica.com/>

This is a small consultancy with which I have collaborated in several projects. I redesigned the page of your site. This site is a development in Wordpress.

MINI REGISTER FORM · <http://armetica.com/mini/>

This was a form that Armetica client requested for the presentation of a new model. It is a form with validations so as not to repeat the emails that have already been registered. The information collected was delivered to the MINI client.

LIVING READY · <http://livingready.mx/>

This site was developed for an Armetica client. It is a place to rent different types of furniture such as rooms, bedrooms, mattresses, screens, and others. This site is a development in Wordpress.

PEDRO Y EL LOBO · <http://pedroyellobo.com/videos/>

This is another Armetica client, this site did not develop it, in this site it was requested to change in the Video section, an infinite scroll was implemented, this means that the oldest videos were shown as it slides down the site .

IAMDMEX · <http://iamdmex.com/>

This site was developed for a "Catorce Studio" client, which is another development consultancy and consultancy in the technological area. This is a site developed in Wordpress.

HOTEL OLIBA · <http://www.hoteloliba.com.mx/>

This is a site that was developed for a Hotel, this unlike the others, was made in another Joomla CMS, which is different and more complex than Wordpress. This was my first developments as an independent in 2014.
